SUMMARY

Results-oriented Mechanical and Mechatronics Engineer seeking a challenging position to apply expertise in designing and implementing innovative solutions for complex engineering challenges. Proven track record of success in project management, problem-solving, and cross-functional collaboration. Adept at utilising cutting-edge technologies to optimise processes and enhance overall efficiency.

WORK EXPERIENCE

- Work with teachers and schools to develop policies that support student well-being.
- Become a liaison between students and teachers in conveying class aspirations regarding learning and school activities.
- Hone leadership, time management, and communication skills through coordinating activities with more than 50 team members
- Identify security threats, implement protection protocols, conduct security audits, and handle security incidents.
- Analyze enterprise system needs and design appropriate technology solutions
- Manage technology projects from start to finish, coordinating teams, and ensuring projects are completed on time.

EDUCATION

- Coordinate with teachers, staff, and students to ensure the success of Student Council programs.
- Take leadership training and be part of the best team at camp
- Cisco Certified Network Associate (CCNA) for networking.
- Diploma or associate degree program in IT, computers or networks
- CompTIA A+ for hardware basics and troubleshooting.

ADDITIONAL INFORMATION

- **Technical Skills:** programming, operation system, network and security, database management, cloud computing
- **Languages:** English, Indonesian
- **Awards/Activities:** actively participated in the "Innovation for Tomorrow" community outreach program, promoting STEM education and inspiring local students, 3rd place in the city-wide quiz competition
